Professional Teaching Experience

DataScientest, Paris, France — Data Scientist:

- Teaching in Data Sciences, MLOPS, Data Engineering (Interpretability, Text Mining, Deep Learning, Voice Recognition, Multibox Detection, production tools, Intro and Streaming of Data), Data Analysis in bootcamp or continuing training in B2B or B2C
- Creating, translating and improving of educational content for DataScientest and OMNES (Couchbase, TechAway)
- Cohort leader (4 to 5 cohorts permanently). Managing learners at the technical and informational level
- Mentoring group projects (15 projects permanently)
- Researching and exploring of new technologies for content creation
- Participating in the educational reorganization of courses (creation of experimental and personal research course formats)
- Internal analytics
- Creating of 2-hour workshops to feed the Youtube channel feed
- Writing articles on technologies associated with data (Altair, PyTorch)
- Exam correction

January 2023 – December 2024

Tutoring with my own firm: Taught and tutored students from Middle School to third year of Bachelor degree. Prepared to Baccalaureate. Bachelor students or Classes Préparatoires students in Medicine, Applied Mathematics, Applied Physics and Chemistry and Quantum Mechanics: course review, exercises and examination preparation

March 2020 – Present

Valdocco, Argenteuil, France — Intern in social and school reinsertion: Street animations on socially difficult sites for children from 2 to 12 y-o. Prepared theater classes for the oldest and led cultural visits such as the Opera House. Organized and participated in trips to the country-side with rural activities such as planting or horse-riding. After-School Tutoring

November 2010 – April 2011

Technologic Institute of Cambodia, Phnom Penh, Cambodia — Assistant Professor in Physics

October 2010

Professional Experience

Météo France, Toulouse, France — PhD in Climatology, Impact of CO2 and Water of Green Roofs on Urban Climate

Nov 2021 – Jan 2022

ThinkEco Inc., New York, USA — Data Scientist: Analyzed, predicted and reduced the electrical consumption of AC's in the residential sector in NYC and other cities in the USA (State of NY, California), with the use of a smart connected device commanding on individual ACs. Used Python, C#, GitHub and statistical models as integration to the firm's computing culture. Dialogued with the main electricity distribution companies and participated to the design of a joint program. Startup in a WEWORK

Dec 2014 – Dec 2015

Education

UPMC, Sorbonne Université, Paris, France, 1st Semester of 2nd year: MSc Climate/Atmosphere/Ocean in prep for a PhD in December

2021

ENS Cachan, Cachan, France — Auditor — MSc Master Vision Apprentissage auditor: Statistics in Large Dimensions, Kernel Method, Stochastic Methods for Image Treatment, Advanced Learning for Text and Graph Data

2016

Columbia University, New York, USA — MSc Civil Engineering: Large-Scale Bridges, Buckling, Concrete and Steel Design, Architecture Materials, Biomaterials, Urban Ecology Studio, Management and Development of Water Resources

2013 – 2014

École Polytechnique, Paris, France — MSc Energies of the XXIst Century and Environment: Initial Military Training, Probabilities, Photovoltaic Energy, Quantum Mechanics, Continuum Mechanics, Plasticity and Fracture, Structural Dynamics, Interaction Fluid-Solid

2010 – 2014

Classes Préparatoires, Lycée Henri IV, Paris, France

2007 – 2010

Extra-Scientific Experience

EVOE, escola de actores, associação cultural, Professional Bachelor Degree, Lisbon, Portugal

Actors Training and Physical Theater - Razaboxe Schechner, Melodrama, Cinema Mudo, Banda Desenhada, Buffoon, Clown, Canto, Decroux, Movimentos de Lecoq, Mascara Neutra, Semi - Mascara, Marionetas, Suzuki and Viewpoints. Training in Production (light, sound, scenery, organization, costumes). Created and participated in a professional Puppet company and a Theater Company

October 2017 – January 2020

Backpacking Journey in South America and Europe: Interviewed professionals from eco-friendly barista to women rights lawyer, inventor-engineer for protection against landmines in the Colombian army or oceanographers studying the continental merger

April 2016 – October 2017

Research Experience and Laboratory Internships

GovLab, NYU, New York, USA — Research Intern with Arnaud Sahuguet, CTO: Trained ML with the labs data and the book Collective Intelligence, interviewed specialists such as Bloomberg Representatives on the future of Data Sciences

September 2014 – December 2014

Columbia University, New York, USA

- Part-Time Volunteer Research Intern with Pr. Lall: Reviewed literature for Mining & Water Risks: Diagnosis, Benchmarking, and Quantitative Analysis of Financial Impacts and Bayesian Inference
- Water Resources Management final project: Studied the feasibility/impact of wells in rural Somalia, introducing statistics for precipitations and data collection, to remedy drought migrations supervised by Pr. Pierre Gentine
- Research Intern at CIESIN, Center for International Earth Sciences Information Network, Lamont Doherty Observatory, Columbia University, Lamont Doherty Earth Observatory, supervisor Senior Researcher Xiaoshi Xing
 - Researched on decadal geospatial quantitative and qualitative impacts of historical SO₂ emissions on global warming in the last 4 decades. Used Microsoft Access, ArcGIS and Office Suite. Introduced remediation regulations proposals in the final report
 - Gathered data and information through various Institutes of Columbia University and agencies (NASA, NOAA) and assisted to numerous conferences on the impact of climate change on a range of subjects as wide as behavioral or hurricanes resilience

July 2014 – September 2014

January 2014 – April 2014

April 2013 – August 2013

Skills

Languages: French, English, Portuguese, Spanish / **Computing:** HTML, CSS, SQL, C#, Python, Matlab, R, ArcGIS, AutoCAD, GCP, Tableau, Looker

Technologies: Docker, Kafka, Airflow, Mlflow, ZenML, GitHub, Prometheus, Kubernetes, DagsHub, DVC, CouchBase, GCP (Certification Professional Data Engineer) (knowledge Jenkins, AWS, postgresSQL, Neo4j)

Specific Interests: Fog Collection, water nucleation, passed successfully the first 2 diving degrees, volunteering for D4G (Pyronear, Bloom, Potentiel Scolaire), La Réserve (pro-bono en Data Science affilié à Bayes Impact), DataKind (pro-bono en Data Science), OpenBooster (Bat'Adapt), hackathons (Instadeep et Doctolib, IBM, Microsoft, SNCF), volunteer journalist for La Jaune et la Rouge, 10 questions to an entrepreneur, Empow'her (coworking with daycare), JiuJitsu (Gracie Barra), CNAM: course of metrology et citizen sciences
